

Energy saving without compromise

Replaces any energy saver

The next generation in energy saving: Philips MyVision LED bulbs. Highest energy saving and very long lifetime, instant light and almost unlimited switching.

Sustainable choice

- 80% to 90% energy saving

Long-lasting

- Up to 25 years' lifetime

Instant start

- Immediate light when switching on

Specifications

Technical specifications

- Shape: Spot
- Wattage: 4 W
- Wattage standard bulb: 35 W
- Fitting/Cap: GU10
- Voltage: 220-240 V
- Colour rendering index (CRI): >80
- Dimmable: No
- Colour: Warm White
- Colour temperature: 2700 K
- Lamp current: 28 mA
- Lamp dimension (height): 56 mm
- Lamp dimension (width): 50 mm
- Lifetime of lamp: 25,000 hour(s)

- Lifetime of lamp: 25 year(s)
- Lumen maintenance factor: 70 %
- Mercury content: 0 mg
- Power factor: 0.53
- Rated lifetime: 25,000 hour(s)
- Rated lifetime: 25 year(s)
- Rated luminous flux: 165 lm
- Rated power: 4 W
- Starting time: < 0.5 s
- Number of switch cycles: 20,000
- Warm up time 60% light output: 0 s
- Lumen: 165 lm
- Beam angle: 36 degree

Highlights

Up to 25 years' lifetime

Bulbs that use modern technologies have a longer lifetime than standard bulbs. With a 25-year lifetime, one lamp replaces 25 standard bulbs. So they save money and last longer, year after year. The lifetime is based on the average usage of 2.7 hrs per day or 1000 hrs a year. This average is influenced by the usage during different seasons (dark winter vs. light summer), the weather conditions (sunny vs. rainy day) and on the room where the lamp is used (short usage in bathroom vs. long usage in living room).

80% to 90% energy saving

Today, we have many different technologies available to make light. Some need more energy, others less, to give a comparable amount of light. This is what makes them more or less efficient. Standard lamps convert only 5% of the energy into light, while 95% of the energy is wasted as heat. Energy saving technologies deliver the same amount of light with 80% to 90% less energy consumption — simply less wasted heat. So they save energy and money.

Immediate light when switching on

Just by turning the switch, your room is at full brightness. No slow starting, no waiting but immediate light.
